Hips to waist length	8 in
Urise (crotch) length	11 in
Jacket length	28 in
Outside leg length	30 in
Inside leg length	24 in
Hem width	2 in

Apparel Selection:

This one of the most basic yet essential features that c-collection **app development** must possess. The app must be able to cater to multiple bespoke clothing items, which may include, but are not limited to-

- Shirts, both formal and party wear
- Coats / Jackets
- Pant
- Waistcoat
- Suit

iamramangoel@gmail.com

Fabric, Cloth And Design Selection

Adding on from the previous feature, the ability to select fabric and type of cloth can be a real game changer. Availability of different types of fabrics provides users to order exactly what they need. They could go for a nice cotton shirt for the summers or a silken cloth for a party. Satisfying all types of customer needs must be high on your priority list when you work on **how to make a mobile tailor app**, and providing the best fabric and cloth selection is an important step towards it.

Designs will be restricted to the following patterns:

- Slim Fit
- Tailor fit
- Regular Fit.

| › Side chest width | › Inside leg length | |
| › Side waist width | › Inseam | |
| › Side hips width | › Outseam | |
| › Sleeve length | | |

Or asked to capture new measurement (as shown in user profile section)

Payment And Shipping Options

Payment options will have Credit cards, net banking, mobile wallets integrated within c-collection mobile tailor app in order to provide hassle-free payment service. You can contact banks in order to set up payment gateways for providing these options. As for the delivery types, priority services, cash collection on delivery, and special requests can impart an added sheen to your product.
